

Community Series Administrator Tools

The following tools are available to administrators: **uploading and managing submissions**, **configuring a series**, **generating reports**, and **distributing email messages**. To access these tools, log in to your account. You will then see a list of the series for which you have been designated an administrator. Make sure you select the correct series, if more than one is listed. Select any operation for the series you are interested in, and you will see the toolbar above at the top of your screen. Each tab on the toolbar will allow you to perform several operations, as detailed below.

Configuration

The **Configuration** tool allows you to set basic appearance and content parameters, enter descriptive text, and select community administrators. This is done via the following 14 fields:

1. Series Title:

The full name of the series

2. Shortened Name of Series:

This is the name of the series that appears in the navigation toolbar; the default is the url of the series, e.g., **chip_docs**. You can change the name to something more appealing.

3. Optional URL for a Web Presence for this Series:

If the series exists online elsewhere, provide the URL here.

4. Introductory Text:

Not the same as the text that introduces the *community*, this is specific to this series. Use HTML coding as necessary.

5. Hide this series:

Unlikely to be used; perhaps if it is desirable to have all the contributions show up at once.

6. Peer-reviewed?

Because of the configuration of DigitalCommons@UConn, checking this box will have no effect; leave unchecked.

University of Connecticut Libraries

Connecticut Institute of Water Resources

Special Reports

Special Reports are publications that cover a wide range of water resources related material including scientific reports, conference proceedings and indexes of water resource related personnel and publications. A full text PDF version of each special report is available by clicking on the title.

[Browse Contents] [Search] [CT IWR Special Reports Website] [Submit a Paper]

- 2002 - Report No. 38: [Precipitation in Connecticut](#), David R. Miller, Glenn S. Warner, Fred L. O'Neil, and Arthur T. DeGaetano
- 2001 - Report No. 37: [...](#)

Optional URL

This link will only show if direct submission is enabled

7. Other formats than PDF?

If you are going to load files other than text files, check this box.

8. Keep older versions?

If you want to allow multiple versions of a given document to show on the site, indicate this here. Otherwise, only the most recently revised (and approved) version will appear.

9. Add a Submit link:

To allow contributors to submit directly to this series, check this box. **Note:** All submissions will be sent to a queue, where you (or another administrator) will have the opportunity to review the submission, and must register a decision before the submission will be posted.

10. Author submission agreement:

This is standard, and must not be changed.

11. Policies:

If series-specific policies are desired, this is their location. Use HTML coding as necessary.

12. Subject Area Picklist:

A picklist will present a list of subjects that can be assigned to a document at the time of submission, simply by selecting the appropriate terms. The list must be created and uploaded as a **.txt** file. Once loaded, it can be downloaded and edited or deleted. **Note:** if a subject picklist is added, the **keyword** field (see below) will be removed; however, it is possible to maintain the keyword field. Contact the Coordinator to do so.

13. Logo:

GIF files only; 100 x 100 pixels maximum

14. Administrators:

The Community Administrator can add or remove administrators, but cannot remove themselves (the Repository Coordinator can do this if necessary). To add an administrator, name and email address are required.

Upload Submission

The **Upload Submission** tool is the heart of the system, and is where submissions are loaded into DigitalCommons@UConn. To start an upload, click on the tab. The following are **required** for each submission: author(s), title, date, file(s), and publication information (if applicable). Optional fields are keywords and abstract. Completing these fields will enhance the discovery and retrieval of the file.

Author(s) and author email addresses

If authors are to be notified automatically when submissions are loaded and available, email addresses are required; otherwise, they are optional.

To input Author information, use the **Add Author** button, and fill out the information. **Note:** this information will already be filled out if you supplied the email address of an author who has an account, or made a previous submission (if they provided their email address with the submission).

Only first and last name are required. If you want to include UConn as the Institution for an author entry, use **University of Connecticut**. Lower level administrative units can be added to the name; i.e., **University of Connecticut Department of History**.

Continue to use the **Add Author** button until all authors are listed.

add authors...

If no email address is entered the author will not be notified about the status of the submission or be able to access or change any information regarding this submission using these web tools.

Author's email address (optional) **To input author information, click here.**

When the list below is accurate and complete

Name/Email	Institution	Order	Delete	Edit
John Doe		1st author	<input type="button" value="Delete"/>	<input type="button" value="Edit"/>
Jane R. Doe	University of Connecticut Department of Storrs	2nd author	<input type="button" value="Delete"/>	<input type="button" value="Edit"/>

Change the order of the authors as needed. **Edit name, institution, and contact information.**

HOME | ABOUT | HELP | MY ACCOUNT | NOTIFY ME | SEARCH

Title: Capitalize all title words, except for prepositions, articles, etc.

Date: Use the date of publication, if applicable, or submission date, if no other date is provided. If month is unknown, use January. If day is unknown, use 1. If no date is entered, the current date will be applied.

Title

Date of this Version

Enter "1" for the day if the actual day is unknown.

Keywords: Use lowercase.

Abstract You can choose the layout using the formatting options available. Use HTML coding as necessary.

File: DigitalCommons@UConn policy is not to accept citations or abstracts only; the full text or other content is required. To upload, files must reside on the loader's computer, or on a server to which he/she has access, **or** reside on a web server and have a URL. The options for loading files that appear on the submission form vary, depending on whether or not file types other than text files are allowed for the particular series (see **Configuration** above). In either case, simply use the Browse button to locate the file, or enter the URL. If other files types have **not** been allowed, the section of the submission form will look like the example below.

upload the main document... ?

Please upload the document as a Word, RTF, or PDF file. All documents are posted as PDF files (Word and RTF files are converted automatically). If creating your own PDF file, be sure to **embed all fonts** and use **Adobe's PDF Distiller** instead of PDF Writer.

OPTIONS (choose one):

Upload a Word or RTF File:

Upload a PDF File:

Or enter a URL if the PDF file is online elsewhere:

If other file types **are** allowed, the section of the submission form will look like this:

upload the main document... ?

Please upload the document below. The system converts Microsoft Word and RTF documents to PDF files, and posts them alongside the original. Other file formats are not converted to PDF, nor is the full text of non-PDF documents included in the search index.

If creating your own PDF file, be sure to **embed all fonts** and use **Adobe's PDF Distiller** instead of PDF Writer.

OPTIONS:

Upload the Original Document:

Upload a PDF Version of the File (Optional):

Or enter a URL if the PDF file is online elsewhere:

Publisher information (if applicable):

This information is generally **required** if the document has been published elsewhere. The information to include regarding prior publication is publisher-dependent, and can often be determined from [SHERPA](#), a web site that lists publisher policies. If unsure of the information to include here, contact the publisher or the Repository Coordinator. In general, include as much of the citation as you would for a reference or works cited list.

This information should go in the **comments field**.

Format also is dependent on the specifications of the publisher. The default for DigitalCommons@UConn is:

Published in *Name of Journal*, Vol. 6, No. 3, pp.347-375 (date) at (line break)
<http://dx.doi.org/10.1016/j.theriogenology.2005.05.052> (the DOI)

Comments...

[Optional] Enter any comments to appear on the web page for this paper (for example, the final location where the article was published, or any other relevant annotation):

Published in Journal of Agricultural & Food Information, Vol. 6, Nos. 2/3 (2004) at
http://dx.doi.org/10.1300/J108v06n02_04

Add publication information (if any) in the Comments field.

Completing your upload may take some time; please only click on the submit button once.

FINAL STEPS

When the fields have been completed, and the file location provided, use the **Submit** button at the bottom of the screen. A preview box will appear, and there will be an opportunity to make any necessary changes, load supplemental files, or make another submission. Use the **Continue** button if no changes or additions are necessary, and then the **Update** button on the next window to post the document. However, if you are loading more than one submission, you may use the **Submit another document** link, and **Update** the series after you have completed all submissions. The submission(s) will show on the site, usually within 10 minutes, though it may take longer to generate a pdf.

Manage Submissions

The **Manage Submissions** tool is used to register a decision on new direct submissions, and to review and revise new and old submissions to a series. If you do not allow direct posting from contributors to the series, you do not have to register decisions on what you (or other community administrators) load. The submission process described above will be all that is necessary to post a document. Using the **Manage Submissions** tool, you will have access to all submissions not yet posted, posted, rejected and withdrawn.

[Log out](#)

[Administrator report](#)

Use the **Revise submission** link to make any changes to the submission. You will see the complete submission form. At the bottom is a new field where you can enter the reason for the revision. This will not show on the site, and will only be available to administrators, when the **View revisions** or **History** link is used. Additional files can be added with the **Supplemental Content** link. If changes are made, use the **Submit Changes** button, and then **Update site** from the navigation bar.

Although the withdrawal of posted submissions is highly discouraged, there may be some cases where it becomes necessary. The **Remove submission** link will accomplish this, and will provide the option to notify the author of the withdrawal. An opportunity is provided to edit the text of the notification letter, which is sent to the authors and the administrator(s) at the time of removal.

NOTE: It is the policy of DigitalCommons@UConn always to notify the author(s) if a posting is being removed.

Administrator reports are available, and are downloaded as Excel spreadsheets. They make available in a manipulable format the metadata assigned to each and every submission.

Direct Submissions by Authors

If you do allow direct submissions (see **Add a Submit** link under **Configuration** above), the **Manage Submissions** tool is where community administrators are directed in order to register decisions on such submissions.

Using the **State** dropdown box, select **Not yet posted**. If new submissions have been made, there will be an orange dot under the **Waiting for Administrator** column, indicating that some action is required.

Choose **Not yet posted**

Action is required.

Attachment 1:

Subject:
 Congratulations! "Talking Points" has been accepted

Body:
 Dear Jonathan Nabe,
 Congratulations, after careful review, your article "Talking Points" has been accepted for publication in DigitalCommons@UConn Documents. We look forward to publishing your article as soon as possible.
 We will be publishing the most recent version of the article that you uploaded. Please look for our periodic announcement of newly published articles, including yours.
 Referee reports and a preview of the article's title page may be viewed here:
<http://digitalcommons.uconn.edu/cgi/preview.cgi?article=1000&context=dcuconn>

Check this box if you do not want to send an email to the authors and administrators.

Select decision from the dropdown menu.

Email notification text can be edited.

Usage Reports

Usage reports can only be run at the series or individual article level. They are sent in Excel spreadsheets as email attachments.

Two types of reports are available:

- **Hits**, which indicate the number of times a given page is accessed
- **Referrals**, which provide information on the internet site from which users were referred to documents in [DigitalCommons@UConn](#).

For either of these types of reports, it is possible to retrieve numbers for **Cover Pages**, **Full Text**, and/or **Searches**.

Type: Report on hits for: Cover Pages Full Text Searches Sort By: Report Format:

Include collection in search?

The report will be processed more quickly if you use smaller date ranges. Report will be emailed to jonathan.nabe@uconn.edu. Check 'Include collection in search' if you want the report to include content which was included via collections.

For dates, the format shown is required.

Select Hits or Referrals

A **Cover Page** is the page that contains the file's bibliographic information and the link to that file, such as the page below. Usage reports for **Cover Pages** do not tell you if the file was actually downloaded, and so may be less useful than **Full Text** reports. The latter indicate that the **Download the Document** link on the cover page was clicked, and the file downloaded.

Searches reports provide the number of DigitalCommons@UConn site searches that retrieve documents within the series.

TITLE:
Cloning animals by somatic cell nuclear transfer

AUTHOR(S):
X Cindy Tian
Chikara Kubota
Brian Enright
Xiangzhong Yang

DOCUMENT TYPE: Article

[Download the Document](#) (PDF format - 400 K) - November 2003
[Tell a colleague](#) about it.

ABSTRACT:
Cloning by nuclear transfer using mammalian somatic cells has enormous potential application. However, somatic cloning has been inefficient in all species in which live clones have been produced. High abortion and fetal mortality rates are commonly observed. These developmental defects have been attributed to incomplete reprogramming of the somatic nuclei by the cloning process. Various strategies have been used to improve the efficiency of nuclear transfer, however, significant breakthroughs are yet to happen. In this review we will discuss studies conducted, in our laboratories and those of others, to gain a better understanding of nuclear reprogramming. Because cattle are a species widely used for nuclear transfer studies, and more laboratories have succeeded in cloning cattle than any other species, this review will be focused on somatic cell cloning of cattle.

HOME | ABOUT | HELP | MY ACCOUNT | NOTIFY ME | SEARCH

Cover Page reports indicate when a page such as this is loaded.

Full Text reports indicate the times this link is clicked.

Referrals reports will provide information on external referral sites. Two formats are available:

Summary, which will provide

- the domain and URL for the referring site, as well as
- the counts

Country, which will list

- the two letter country code for all non-U.S. referring sites,
- a URL which will provide the corresponding country name for the code, and
- the counts

Note: Authors who have an account can opt to receive automatically monthly reports on the number of downloads of their submissions. This is done in the **Email Notification** section of the personal account.

Mailing Lists

Mailing Lists can be created in order to send emails to a defined list of interested subscribers. In order to control spam and viruses, all emails are first sent to bepress personnel, for approval before distribution. Messages are usually approved and sent the next business day.

[Messages](#)

[Subscribers](#)

[New message](#)

[My account](#)

Click on the tab to access the mailing list tools for the series. Use the navigation sidebar to view previous messages, create or edit the list of subscribers, and create a new message.

The **Subscribers** link will allow you to add single email addresses or upload an ASCII text file with a list of email addresses. It also allows you to unsubscribe individuals by email address. You can download an ASCII text file of current subscribers.

Current subscribers:	1	Add a single address:	<input type="text"/>
Your subscriber limit is:	100	Unsubscribe an address:	<input type="text"/>
Download current list :	Download	Upload additional addresses	<input type="text"/> <input type="button" value="Browse..."/>
Download is a tab delimited text file format: "email TAB unsubscribed TAB date of user unsubscribe"		(ASCII text file, one address per line):	
<input type="button" value="Save changes"/>
